<u>Claims</u>

What is claimed is:

6

7

- 1 1. A method for establishing rates for a property insurance policy comprising:
 2 establishing a single tier placement dependent upon a combination of
 3 mutually exclusive factors based on applicant data, such that no single risk
 4 characteristic is the sole determinant for placement in a tier, the factors
 5 including:
 - a) determining a protection class; and
 - b) determining a previous paid loss history.
- 1 2. The method as defined in claim 1 wherein the policy is a renewal policy.
- The method as defined in claim 2 wherein the protection class is one of a plurality of nationally published numbers.
- The method as defined in claim 3 wherein the nationally published numbers are in a range of from 1 to 10.
- The method as defined in claim 2 wherein the previous paid loss history establishes one number in a range of from 0 losses to 3 or more losses paid in a previous three year period.
- The method as defined in claim 1 wherein the previous paid loss history is established based on one or more of information provided by an applicant, information provided by an insurer, and information provided by a third party.

Docket No.: 11857.68 Customer No.: 000027683

1	7.	The method as defined in claim 1 further including: determining an insurance credit score.
1	8.	The method as defined in claim 7 wherein the policy is a new policy.
1	9.	The method as defined in claim 7 wherein the insurance credit score is derived from a nationally used credit model.
1	10.	The method as defined in claim 9 wherein the insurance credit score is a three digit number which falls into one of a set of multiple ranges.
1	11.	The method as defined in claim 7 wherein the protection class is one of a plurality of nationally published numbers.
1	12.	The method as defined in claim 11 wherein the nationally published numbers are in a range of from 1 to 10.
1 2 3	13.	The method as defined in claim 7 wherein the previous paid loss history establishes one number in a range of from 0 losses to 3 or more losses paid in a previous three year period.
1 2 3	14.	A system for establishing rates for a property insurance policy comprising: a computer system for establishing a single tier placement dependent upon a combination of mutually exclusive factors based on applicant data, the computer system including:
4 5 6		a storage device storing a program; and a processor coupled to the storage device, the processor
7 8		operative with the program for establishing the single tier placement in response to determining a protection class factor and a previous paid

loss history factor.
